PicNet IT Consulting Services

Our Philosophy

Our philosophy is founded on a sound Project Execution methodology that tightly controls the scope, whilst always remaining pragmatic and focused on the end result. For many organisations projects seem to run seamlessly throughout the planning phase, however when it comes to execution, things seldom go to plan.

PicNet has developed a culture of execution which is supported by a methodology that guarantees a successful execution and end result through the following:

- Tasks or issues log
- Resource and Cost Matrix
- Management reports
- Regular team meeting & updates
- Document management

Our Objectives

Our objectives are clear, concise and provide a solid foundation for success.

1. Complete the project as per specifications.
2. Deliver results on time.
3. Remain within budget.

I'd worked with consultants at PicNet before and I knew that if I could immerse them in our business and then harness their technical expertise – there'd be benefits all round. It was definitely the quality of the people that set PicNet apart.

John Doran - Regional IS Director ANZ, Reckitt Benckiser
