

# IT for SMEs

Powered by best in class cloud providers; Amazon Web Services and Microsoft.

A new IT has arrived; an IT of low cost but with capabilities previously available only to large enterprises.

Utilising PicNet's experience in the enterprise and powered by best in class cloud providers, PicNet is able to offer cost effective but reliable, robust and secure IT solutions to SMEs.

### **PicNet for SMEs feature significant cost reductions in IT, specifically in:**

- Electricity
- Cooling
- Rack space
- Hardware
- Storage
- Networking equipment
- Management

### **PicNet for SMEs bring to you additional capabilities to:**

- Go global in minutes
- Accelerate go to market by deploying IT faster and effective
- Pay as you go - little or no need for capital investment, i.e. immediate write off of your IT expenses
- Elasticity - growth or shrink as needed and fast - no longer need to wait for months to get new servers installed
- Reliable - much more reliable than your own hosted gear
- Secure - Security managed by experts
- Redundancy and fast recovery after disaster - multiple options for low or high availability system needs

### **PicNet and Amazon Web Services - partnering to bring unparalleled productivity to your organisation.**

As an Amazon Web Services (AWS) Consulting Partner PicNet specialises in Cloud adoption and have developed working practices and solutions that smooth your transition to Cloud. This transition enables increased productivity and cost rationalisation allowing your business to grow strategically.

### **PicNet can help you with:**

- AWS Cloud strategy
- Migration to AWS Cloud
- Cloud solution implementation
- Cloud based application integrations
- Ongoing management and support of AWS Cloud infrastructure and solutions
- Other Information Technology Services are tailored as per customer requirements.

### **Example PicNet services for AWS:**

- Helping you build a business case to move to AWS and a migration roadmap
- Supporting you in the planning, architecting and delivery of the right AWS infrastructure
- Supplying resources you need to implement, deploy, run, scale and manage your AWS Cloud solutions
- Providing managed AWS cloud hosting infrastructure for your internal and externally facing services including development and testing environments for software developers
- Delivering AWS based Backup and Disaster Recovery infrastructure

### **Microsoft Office Applications in the Cloud**

Migrating to Microsoft Office 365 can be an easy financial decision; however the migration project needs the expert assistance of professionals.

PicNet can help you through the decision process, the technical platform and architecture design as well as the implementation and support of your Microsoft Cloud solutions.

### **Cloud Application Development and Integration with Windows Azure and HTML5**

When you are looking for flexibility, reliability and cost effective Cloud based custom software and web development for your business, PicNet has the resources to help you. Our highly skilled developers use a range of the latest development tools and cloud-based services to ensure your applications and web implementations are developed quickly and efficiently in the right environments for your business.

#### **Window Azure**

As more organisations are embracing cloud computing, the Windows® Azure platform is fast becoming the platform of choice to make this change happen. At PicNet, we help you take advantage of everything Windows Azure has to offer - from migrating legacy applications and web applications to creating new custom solutions.

#### **HTML5**

We use the latest HTML5 technologies for developing web and mobile applications supported across different browsers and platforms. Whether your Cloud application requires high-definition multimedia content or you are looking for ways to increase the overall speed and performance of your applications, HTML5's responsiveness will help you achieve this.

PicNet uses the powerful features of HTML5 such as geo-location services, drag and drop, responsive user-interface, offline storage, multimedia components to deliver high quality applications on the web.

PicNet's development staff are trained on an ongoing basis - allowing you to benefit from their up-to date technical knowledge of the latest technology for Cloud solutions.
