

IMPROVING THE IT HEALTH OF AUSTRALIA'S HEALTH SECTOR

Since 2002, PicNet has provided IT services and solutions to many of Australia's major corporations, government enterprises and private organisations; these include NSW Health and a wide range of pharmaceutical and other health-related businesses. Our years of experience in this sector have given us an in-depth understanding of the constantly changing needs, opportunities and challenges.

Cost-Effective, Custom Software Solutions

Many of the challenges are unique and require solutions that engage our commercial, technical, and procedural skills and experience.

The result is custom enterprise systems that deliver 'above and beyond' expectations – always on time and on budget.

Health Care Benefits from PicNet's Enterprise Software Engineering Services

Designed to improve productivity, reduce health care costs, enhance patient care and outcomes, and also enhance working environments. Plus, our ongoing support ensures the health and stability of systems, long into the future.

Sensitive Data and Privacy

Data security and privacy is central to PicNet's system design. Using only local talent, local infrastructure, and best in class technologies and methodologies, PicNet is able to ensure greater safety and privacy of your data.

PicNet can help you build your next multi-device application in areas such as:

Staff and Resource Planning

Patient Demand Forecasting

Patient Flow Management Systems

Real-Time Dashboards and Advanced Reporting Solutions

Costing Studies

Large Scale Data Analysis and Machine Learning

SUPERIOR

“ A very professional supplier who is easy to work with and delivers quality solutions. ”

NSW Health

CASE STUDIES

Patient Flow Portal

is the new, user-friendly version of the Patient Flow System, a framework to improved patient flow and the patient experience. We managed the technology upgrade and delivered a fast, efficient great-looking refresh to the existing system.

Clinician Billing Portal

is a new system that enables identification of MBS items and other chargeable items for billing purposes. This system also provides Staff Specialists with reports indicating amounts invoiced and received from any NSW Health facility involved.

Emergency Access View

is a web-based application that provides real-time performance for all Emergency Departments across NSW. It increases transparency of problematic processes and tasks; and accurately measures demand status and patient flow performance.

mLoad

is a system used throughout NSW by hospitals and Local Health Districts to upload data from various source systems. This data is then converted to a format that is compatible with the new data warehouse (EDWARD). Currently, mLoad has over 840 validation rules that are run against the uploads, ensuring data in EDWARD meets the highest possible standard of quality.
